

계정 접속 방법 추가 시 오른쪽 하단에 Driver Settings 클릭

The image shows the 'Connect to a database' dialog box with the 'Oracle Connection Settings' tab selected. The 'Driver name' is set to 'Oracle'. In the bottom right corner, the 'Driver Settings' button is highlighted with a red rectangle. Other visible fields include Host (localhost), Port (1521), Database (ORCL), and Authentication (Oracle Database Native).

Libraries탭 이동 -> 화면에 존재하는 내용 모두 삭제 후 Add File
-> ojdbc10.jar 파일 선택 후 OK

The image shows the 'Edit Driver 'Oracle'' dialog box with the 'Libraries' tab selected. The 'Libraries' list contains the file 'C:\tools\06_DB\ojdbc10-full\ojdbc10.jar'. The 'Add File' button is highlighted with a red rectangle. Other buttons visible include 'Add Folder', 'Add Artifact', 'Edit ...', 'Delete', 'Download/Update', 'Information', 'Classpath', 'Driver class', 'Find Class', 'Reset to Defaults', 'OK', and 'Cancel'.
